## **News Announcement**

### **For Immediate Release**

Meritor Tire Inflation System by PSI Presented to  
2008 MATS Beauty Championship Winner

San Antonio, TX (April 29, 2008) ArvinMeritor and Pressure Systems International have chosen Ed Bosket, a Paul K. Young Memorial Truck Beauty Championship winner from the 2008 Mid-America Truck Show, as this year's recipient of a Meritor Tire Inflation System (MTIS™) by PSI with ThermALERT™ technology.

Mr. Bosket owns a 2007 Freightliner Coronado which he displayed at Mid-America. He has leased his equipment for over 20 years to Arnold Transportation and primarily operates as a dedicated carrier of retail goods. When contacted about winning the MTIS™ system, Bosket said that of he was pleased because "I know Arnold Transportation really believes in MTIS™ and with my costs rising so rapidly, I hope having the system on a trailer that I pull, will help reduce my fuel usage and overall tire costs." A MTIS™ retrofit kit will be sent to Mr. Bosket in Florida.

The Meritor Tire Inflation System (MTIS™) by PSI, the most widely-used automatic tire inflation system in the commercial vehicle industry, is a robust, simple design easily installed on any type of trailer, including van, liquid tank, logger, flat bed, chassis, livestock, platform, drop frame, dump, deep drop, doubles, dry bulk, reefer, auto transporter, and military. ThermALERT™, an advanced MTIS™ by PSI

technology detects increased wheel end temperatures and helps alert drivers to stop for repairs before serious damage can occur. This early warning helps reduce the potential risk, cost and downtime associated with wheel loss, wheel end failures, and trailer fires.

PSI is the world leader in automatic tire inflation systems and markets and sells its product worldwide through ArvinMeritor as the Meritor Tire Inflation System by PSI. For more information about Pressure Systems International visit their website [www.psi-atis.com](http://www.psi-atis.com) ArvinMeritor ([www.arvinmeritor.com](http://www.arvinmeritor.com)) is one of the industry leaders in supplying technologically advanced axle-braking and suspension systems solutions as original equipment for medium and heavy-duty trucks, trailers, buses, coaches and specialty vehicles worldwide.
